PROFESSIONAL SUMMARY

Full Stack Engineer specializing in AI-integrated SaaS platforms – React, Next.js, Node.js, AWS/Cloudflare. Built and shipped multi-tenant production systems end-to-end, from relational schema design through deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL

AI / Generative AI: LLM Application Development, Gemini API, OpenAI API, Prompt Engineering, RAG, Multimodal AI

Frontend: React.js, Next.js 14/15, Tailwind CSS, shadcn/ui, HTML5, CSS3

Backend & Database: Node.js, REST APIs, System Design, PostgreSQL, Drizzle ORM, SQLite

Cloud & DevOps: AWS (RDS, Cognito, Lambda, S3, CloudFront), Cloudflare (Workers, Pages, D1, R2), CI/CD (Wrangler)

Practices & Tools: Git, GitHub, Agile/Scrum, Data Structures & Algorithms, Linux, Stripe

EDUCATION

Indian Institute of Information Technology, Design and Manufacturing Jabalpur

B.Tech in Computer Science and Engineering

Jabalpur, MP

Aug 2024 – Present

PROJECTS

Industry Insights Platform | *Next.js 14, TypeScript, Cloudflare, Drizzle ORM, AI APIs*

Jun 2026 – Present

- Architected and deployed a 22-vertical multi-tenant market intelligence SaaS platform as a Turborepo monorepo, each app backed by a dedicated Cloudflare D1 database, R2 media bucket, and custom domain – fully serverless, edge-deployed with zero traditional servers.
- Designed a 30+ table relational schema (Drizzle ORM, SQLite) and an AI-powered content pipeline with automated report generation, webhook-triggered news/blog creation, a QStash-based drip scheduler, and a 27-endpoint system for web crawling, duplicate detection, and health monitoring.
- Developed 35+ reusable React report-block components (market sizing, SWOT, Porter's Five Forces, interactive charts) with Excel/PDF export, an admin CMS with RBAC/audit logging, multi-gateway checkout (Stripe, PayPal, Razorpay), and automated cross-vertical deployment via Wrangler CLI and the OpenNext Cloudflare adapter.

SoulHome Membership Platform | *Next.js, AWS RDS, Cognito, Stripe* | [Live](#) | [GitHub](#)

Feb 2026 – Aug 2026

- Architected a full-stack Next.js educational and membership platform using AWS RDS (PostgreSQL) for relational data modeling and AWS Cognito for role-based access control across public, dashboard, and admin routes.
- Engineered an end-to-end Stripe payment and enrollment workflow processing 50+ course purchases, with automated email confirmations via serverless AWS Lambda and Resend, and a Tiptap-based admin CMS for blogs and digital resources backed by AWS S3 media storage.
- Implemented a waitlist and lead-generation system, using AWS CloudFront and Next.js server-side rendering to deliver fast-loading, conversion-optimized marketing pages.

AI Mock Interview Platform | *Next.js 15, Supabase, Gemini API, MediaPipe* | [Live](#) | [GitHub](#)

Dec 2025 – Jul 2026

- Developed a full-stack AI mock interview platform (Next.js 15, Supabase) integrating Gemini 2.0 Flash for context-aware conversational interviews with tailored follow-up questions and post-session scorecards.
- Implemented a real-time live coding environment for DSA rounds using Monaco Editor and server-side code evaluation, with AI-generated problems, logic assessment, and instant feedback.
- Built a Google Meet-style interview room with Web Speech API live transcription, Google Cloud TTS, and MediaPipe (FaceLandmarker & PoseLandmarker) for real-time body language, eye contact, and posture grading – backed by Zustand state management, a Tailwind/shadcn/React Three Fiber UI, and Supabase-based auth and session history.

ACHIEVEMENTS

3-Star rated on CodeChef; active competitive programming participant.

Runner-up at the “Can You Hack It?” Hackathon hosted by IIITDM Jabalpur.

Solved 100+ Data Structures and Algorithms problems across LeetCode, Codeforces, and CodeChef.
